---

2.

Last Name\*:

---

3.

Phone Number\*:

---

4.

Email\*:

---

5.

Property Address\*:

---

6.

Account Number:

Please enter the account number found on your water bill:

7.

Type of Occupancy:                      Owner  
(Circle One)                                      Renter/ Tenant

---

## Pipe Information

---

8.

Identify and Selection of Water Service Line Material:

Use the link below to help determine the material of your water service line:

<https://www.islr-collaborative.org/identifying-service-line-material.html>

Or if filling out the survey via hard copy, **please use figure below to determine your water service line and circle the service line material that best resembles your water service line:**

### Visual scratch testing

Lead is a dull gray color and very soft. If scraped with a key it will turn a bright silver color. Even a very strong magnet will not stick to lead.

DC Water: Understanding your Water Service Pipe

<p><b>Types of water pipes</b> Follow the guidance below or contact a licensed plumber to determine the material of your water pipes. To identify the material of your service pipe material on private property, check your household water service connection, typically located in the basement.</p> <p>Homeowners should identify and replace old household pipes, particularly galvanized plumbing and sources of lead. The type of household plumbing can vary throughout your household.</p>	<p><b>Lead</b>  A dull, silver-gray color that is easily scratched with a coin. Use a magnet - strong magnets will not cling to lead pipes.</p> <p><b>Galvanized</b>  A dull, silver-gray color. Use a magnet - strong magnets will typically cling to galvanized pipes.</p> <p><b>Copper</b>  The color of a copper penny.</p> <p><b>Plastic</b>  White, rigid pipe that is joined to water supply piping with a clamp.</p>
